Services and Programs

SLV Community Mental Health is committed to offering a comprehensive array of effective services including prevention, intervention programs to mental health outpatient, addiction treatment services and judicial and offender services.

Specific mental health services include: crisis intervention, psychiatric, mental health outpatient services, and substance abuse treatment. We also offer supportive services such as housing, domestic violence treatment and client and family resources. By offering these supports, we provide recovery-oriented services that treat the whole individual, not just the illness. The center also offers innovative prevention services / intervention services and works with the community on various coalitions and task forces.

For further questions please look under the [FAQ \(How Do I Start Services?\)](#) or call 719-589-3671.

Other specific programs that provide support services to older adults include:

- Retired Senior Volunteer Program 719-587-5619
